"A dedicated professional pursuing a PhD in Computational Evolutionary Linguistics and a proven track record in international public relations, media management, and strategic communication. I have diverse experience from internships at leading news agencies like Austria Presse Agentur (APA) and the weekly newspaper DIE FURCHE, where I honed my skills in content creation, media relations, and digital communication. Additionally, I bring valuable experience in organizing large-scale international conferences and managing social media channels to effectively engage global audiences. Fluent in Bosnian/Croatian/Serbian and with strong analytical skills, I am eager to leverage my background in public relations and media to contribute to the impactful work of the United Nations in Bosnia and Herzegovina."
